FRUIT AND ORNAMENTAL TREES
EVERGREENS, PALMS, ROSES, ETC.

1906-1907

NILES, CALIFORNIA

SIX HUNDRED ACRES

TO CORRESPONDENTS

1st. This Catalogue cancels all previous prices, either in special lists, offers or catalogues. This rule will be strictly observed.

2d. All orders should be sent in as early as possible.

3d. Orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes.

4th. The articles in the following list will be furnished at the annexed prices only when the quantity specified shall be taken. Fifty, however, will be furnished at the hundred rate, and five at the ten rate. In no case does this mean so many trees of assorted classes, but refers only to one class of assorted varieties, for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apples, 2 Pears and 1 Plum.

5th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

6th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

7th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

8th. We warrant all trees and plants to be good, thrifty and true to label, but having no control over the planting or care after delivery to the buyer, we will not be responsible in any other direction than as stated, and accordingly if any tree or plant should prove untrue to kind, we will either replace the same or refund the amount paid; but in no case will we be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery of the same shall have been accepted by the buyer.

9th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.

10th. Orders from unknown correspondents must be accompanied by the cash or satisfactory reference. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; otherwise they will receive no attention.

11th. Remittances may be made by draft on San Francisco, or Wells Fargo & Company and postoffice money orders on Niles, or cash by express, prepaid.

All communications to be addressed to

CALIFORNIA NURSERY COMPANY

Niles, California.

Remarks

We have pleasure in submitting herewith our price-list for the coming season (twenty-second edition). It is our aim and intention, as hitherto, to supply only the best stock at the lowest prices, and the stock on hand for the coming season is larger and more varied than ever before. We invite all to visit the Nursery, which is the largest, by far, of any on the Pacific Coast, whether as intending purchasers, or otherwise. **If parties will notify us of the time of their arrival at Niles, we will have conveyance at station to meet them.**

To reach our Nursery from San Francisco, take the broad gauge ferry-boat for Oakland, leaving at 7:40, 8:40 and 11:40 a. m., and 3:40, 4:00, 4:40, 5:20 and 6:20 p. m. These make close connections with through trains direct to Niles. From Sacramento and all points centering there, the train leaving at 10:10 a. m. for San Francisco, via Lathrop, Tracy, Livermore, etc., should be taken. From San Jose and its southern connections, trains leaving at 5:15, 6:15, 7:50 and 9:25 a. m., and 12:30 and 4:30 p. m.

CALIFORNIA NURSERY COMPANY.

Niles, November 1st, 1906.

OFFICERS:

Wm. J. Landers, President,
John H. Henn, Secretary,

W. V. Eberly, Manager.

H. W. Meek, Vice-President,
Central Bank, Oakland, Treasurer,

DIRECTORS:

Wm. J. Landers, San Francisco,
Horry W. Meek, San Lorenzo,
Egbert B. Stone, Elmhurst,

F. W. Hosmer, San Francisco.

Special Notice

Those only who can show a certificate of recent date, signed by the President and Manager and with the seal of the company attached, are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practice of unprincipled persons to procure the catalogue of prominent nurseries and take orders in their names which they fill with poor stock bought elsewhere. If our patrons will notify us of any person who they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

Hints on Transplanting

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we have concluded to offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, it is well to shade the sunny side of the tree, to keep borers out, with a board or shake, stuck in the ground, or a piece of burlap wound loose around the tree up to the limbs, top tied loose with a string. Whitewash made out of whiting or lime will also protect the tree against sunscald.

The following works, by California authors of wide experience, and written with Pacific Coast conditions particularly in view, will be found very useful to all Horticulturists:

"California Fruits, and How to Grow Them," by Prof. E. G. Wickson, \$2.50.

"The Raisin Industry," by Prof. Gustav Eisen, \$3.00.

"Grape Culture and Wine Making," by George Husman, \$2.00.

For the convenience of our customers we have arranged to furnish them at the above publishers' prices.

Distance for Planting

Standard Apples	25 to 30 feet apart each way
Standard Pears	20 to 24 " " "
Strong-growing Cherries	20 to 24 " " "
Duke and Morello Cherries	18 to 20 " " "
Standard Plums and Prunes	20 to 24 " " "
Peaches and Nectarines	20 to 24 " " "
Apricots	24 to 30 " " "
Grapes	7 to 10 " " "
Currants and Gooseberries	4 by 6 feet
Raspberries and Blackberries	3 to 4 by 5 to 7 "
Strawberries for field culture	1 to 1½ by 4 to 5 "
Strawberries for garden culture	1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distance Apart.

Distance, 1 foot apart each way, number plants	Square Method	Equilateral Triangle Method

" 35 " " " " "	48	55
" 40 " " " " "	35	40
	27	31

Rule—Square Method.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

PRICE LIST

of

California Nursery Co.

SEASON OF 1906-1907

Prices quoted herein are for quantities and sizes specified; for extra sizes, varieties, or quantities other than mentioned, special prices will be made. Estimates cheerfully furnished on such lists.

For index, see last page of Catalogue.

FRUIT DEPARTMENT

All our Fruit Trees are grown on whole Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

All of our Apple Trees and Grapevines are fumigated with hydrocyanic gas when dug, so are the buds, cions, and cuttings, prior to budding, grafting or planting out in Nursery. This positively kills any insects that may be thereon, without any injury to trees or vines. We have erected on our grounds a new Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

Apple

—Grafted on Woolly Aphis Proof Roots
(Northern Spy and Winter Majetin),
Sizes and Varieties as follows, viz.:

2 years.....	4 to 6 ft.	75	6 00

WALNUTS

The planting of the improved varieties of the "English" Walnut is steadily increasing, not only in Southern California, but along the whole Pacific Coast, even into British Columbia. These trees are as profitable as any other fruit, and are long-lived if planted in suitable soil, which should be deep, well drained, and capable of retaining the moisture during the summer.

ORNAMENTAL DEPARTMENT

DECIDUOUS ORNAMENTAL TREES

Trained Trees

This class includes a variety of large-sized trees, whose straight, regular stems were headed back or cut down to a uniform height of nine feet, and handsome, well-formed heads grown thereon. They are in splendid shape for planting on avenues, streets or roadsides for immediate effect. With ordinary care, little or no loss should occur in moving them, as they have been frequently transplanted.

Diameter given is four feet above ground.

EVERGREEN TREES AND SHRUBS

Nearly all the Plants mentioned under this heading have been once or more transplanted, thereby greatly adding to the certainty of their growing. In order, also, to reduce the amount of soil and consequent freight charges, we have grown those varieties most in demand in pots. In shipping to distant points this is especially advantageous.

BAMBOOS

Bamboos cannot be too highly recommended in garden decoration. This class of plants forms one of the striking characteristics of the vegetation of China and Japan, where many species occur that are hardy here in California. They thrive best in a deep, rich soil, and require plenty of water when in a growing state. Under the general name of Bamboo are included species belonging to several genera, as *Arundinaria*, *Bambusa*, *Phyllostachys*, etc.

Stock offered is very fine. Plants are bushy.

Palms, Dracænas, Agaves, Yuccas, Etc.

PALMS

Palms have now become almost indispensable in all decorations, whether for apartments, or conservatories, or the production of tropical effects in landscapes. No class of plants makes such a grand display, and none are of more easy culture. Rich soil, mulching and watering will, in a short time, produce grand specimens.

While our main stock of these highly desirable garden ornaments is grown in the open ground, thereby obtaining the finest plants, we also cultivate more or less of each variety in pots or boxes. These are well-established, well-furnished specimens, suitable for hall or house decorations, or, where immediate effect is desired out-of-doors, they can be used to great advantage, being almost absolutely safe from any set-back.

ROSES

Having determined to keep fully up with the times in the propagation of this beautiful flower, we have greatly enlarged our facilities to supply the ever-increasing demand and can now offer a collection such as cannot be found elsewhere on the Coast and in but few other establishments on the continent. The plants offered are strong and vigorous, have been grown entirely in the open ground and consequently will not require the careful nursing necessary to those propagated under glass in three months' time and sold at low rates. They cannot fail to give entire satisfaction the first summer after planting. From November to March they can be shipped in a dormant state, packed in moss. For culture best adapted to each class, we refer to our Descriptive Catalogue No. 2.

New and Scarce Varieties

Price: Each, 40 cents; per 10, \$3.00.

Aurora—Bright glowing pink.

Baby Rambler—Crimson.

Bessie Brown—Creamy white.

Climbing Brides Maid—Pink.
